

GUIDELINES FOR QUARANTINE AFTER EXPOSURE

This flow chart can help guide quarantine decisions after a person is exposed to someone with COVID-19.*

Did you have contact with a COVID-19 case?

Not a contact, however exposed person is recommended to:

- Wear a mask indoors for 14 days after exposure.
- Monitor for symptoms for 14 days after exposure.
- If symptoms develop, isolate at home for at least 10 days from symptom onset date.
- Consider testing for COVID-19 5 days after exposure.

Contacts are required to:

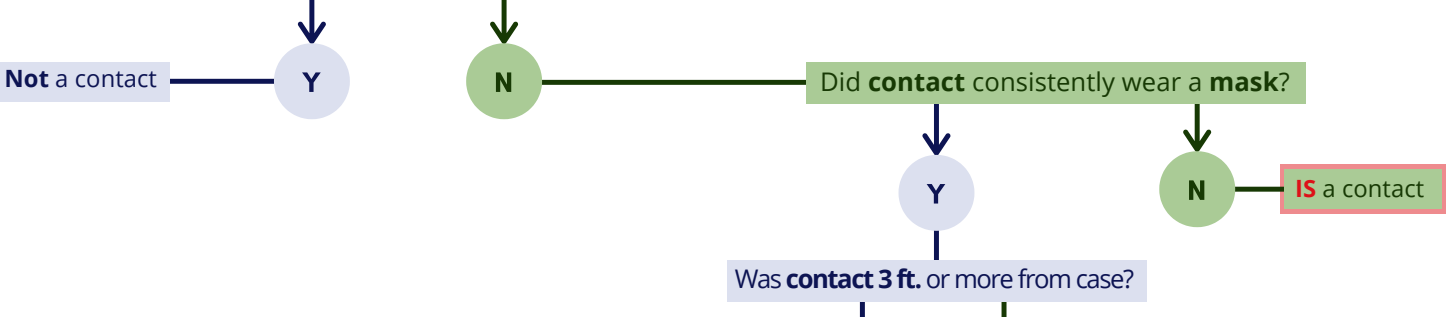

- Quarantine at home for 10 days from last exposure date or 7 days from last exposure if the individual has a negative viral test after day 5.
- Monitor for symptoms for 14 days.
- If symptoms develop, isolate at home for at least 10 days from symptom onset date.

Does the school have **ALL** of the following in place?

1. **Masking** for students and staff*** (regardless of vaccination status)
2. Strategies to **maximize physical distancing** (at least 3 feet between desks)
3. Documented **COVID-19 prevention policies** and procedures (identification of individuals experiencing symptoms, strategies for increase ventilation, protocols for cleaning, etc.)

Did the exposure occur in a **K-12 classroom setting****

Y → Not a contact
N → IS a contact

Not a contact, however exposed person is recommended to:

- Wear a mask indoors for 14 days after exposure.
- Monitor for symptoms for 14 days after exposure.
- If symptoms develop, isolate at home for at least 10 days from symptom onset date.
- They can remain in the normal in-classroom setting and participate in extracurricular and sport activities as long as they have no symptoms.

*This flow chart is a guide to help identify contacts. Some situations may deviate from the flowchart. (e.g. prolonged exposure in an enclosed environment, household settings).

**A classroom setting does not include exposure in the community, sports, or extracurricular activities.

***Students and staff who do not wear a mask during exposure will be required to quarantine.
