

### **Hepatitis A and Food Service Workers**

#### What is Hepatitis A?

Hepatitis A is a serious liver infection that causes liver inflammation. It is transmitted through contact with an infected persons' stool. This typically occurs via fecal-oral route. The infection can last for several weeks or it can last for several months.

#### What are the Symptoms?

There are multiple symptoms of a hepatitis A infection and those include.

- Fever
- Jaundice (yellowing of the skin/eyes)
- Dark urine
- Light or clay colored stool
- Abdominal pain or diarrhea
- Vomiting/nausea.

Some people may have no symptoms at all.

# At Risk Populations Recommended to Get Vaccinated

- Men who have sex with men
- Those experiencing homelessness
- Intravenous (IV) and non-IV drug users
- Those who are incarcerated
- Those infected with hepatitis C

#### Hepatitis A Connection with Food Service

The most common route for the hepatitis A virus to be transmitted is via fecal to oral. Because of this it is easily transferred through the contamination of food or water.

### Why Preventing the Spread of Hepatitis A is Important in Food Service

An employee who is infected with the hepatitis A virus could potentially spread the virus to hundreds and even thousands of people by contaminating surfaces, utensils or food.

## Ohio Food Service Laws on Those Showing Symptoms or Infected With Hepatitis A

The person in charge shall restrict the duties of a food employee with symptoms of hepatitis A.

The person in charge shall restrict the duties of a food employee or exclude a food employee diagnosed with hepatitis A until 10 days after the initial onset of symptoms.

Refer to Ohio Administrative Code 3717-1-02.1

### How to Protect From Spreading Hepatitis A in a Food Service Setting

There are a couple of food safety measures people can take to prevent spreading germs through food.

- Wash hands thoroughly for 20-30 seconds after using the restroom. Hand sanitizer DOES NOT replace handwashing.
- Wash hands before starting to prepare any food even if one does not feel ill.
- Wear gloves when preparing ready-to-eat food.
