Miami County Public Health COVID-19 Update

Miami County - Miami County Public Health is issuing an update on the COVID-19 in Miami County.

Over the past week, from May 23, 2020-May 29, 2020, Miami County has had 17 new COVID-19 cases and 2 new hospitalizations. This brings the total number of COVID-19 cases for Miami County to 355.

This week, MCPH began working with congregate living facilities to initiate testing in accordance to the recommendations by Governor DeWine and ODH Director Dr. Acton. Under the ODH guidelines, COVID-19 testing should be conducted in all congregate living settings throughout Ohio. So far there have been no positive COVID-19 test results from those that were tested this week. In the coming weeks MCPH will continue working with these facilities to conduct testing for individuals.

As the community moves into the summer season and we begin to interact more with others, it is important to be cautious and help slow the spread of the virus. Stay home if you are sick, avoid those who are sick, practice safe social distancing and wear a face covering where social distancing is challenging. MCPH will continue to update the community on the evolving COVID-19 situation in Miami County.
