For Immediate Release

Miami County Public Health COVID-19 Update

Miami County- Miami County remains at a Red #3 COVID-19 risk level. This is due to Miami County meeting the criteria for three of the seven Alert Indicators and continues to be listed as a High Incidence Area:

- 50+ cases /100,000 population within last two weeks
- More than 50% of new cases are from non-congregate care living
- Hospitalization Trajectory increase over a 5-day period

This risk level indicates very high exposure and spread of COVID-19. It is advised that community members limit activities as much as possible and follow all current health orders. Limit events over ten people and non-essential activities as much as possible. Miami County will stay at a Red level #3 until we are no longer in the high incidence category.

For more information on the Public Health Advisory System visit:

Since April 2nd, 2021, there have been 170 new COVID-19 cases which brings the total number of cases in Miami County to 10,525, with 549 hospitalizations, 212 deaths, and 10,072 presumed recovered.

Next week, Miami County Public Health will be hosting multiple open COVID-19 vaccine clinics and beginning Friday, April 23rd, the new MCPH COVID-Vaccine Clinic site will be open for the first clinic. These clinics will offer the Moderna vaccine to anyone age 18 or older.
