¹ Soils analysis, topographic information, and septic system designed by Health Department

² Soils analysis, topographic information, and septic system designed by an engineer usually costing homeowner \$1000-2000

³ Submit site plan with topographic information, designated sewage area, soils analysis (rely on USDA Soil Survey Manual).

Usually done by an engineer, sewage installer, or homeowner. Separate sewage system design to be submitted.

Installers charge an **additional fee** included in overall price of system.

⁴ 2 step process. First, Land Evaluation: test holes, and rely on USDA Soil Survey Manual. Second, Placement Evaluation: Installers design systems and do general location of system. Installers charge an **additional fee** included in overall price of system.

⁵ Homeowner and installer decide what type of system, submit plan, and determine system placement on lot. Installers charge an **additional fee** included in overall price of system

^{3,4,5} - **Additional fees** are routinely \$100-500
